Original ADO[®] - Wooden roll up grids - model H

as underfloor convector / air duct cover

made from high quality natural wood, left in its natural colour, varnished with tough, transparent paints or stained to match adjoining wooden parquet floors

suitable for domestic living spaces as well as for offices

technical properties:

- walkable
- very strong
- homelike
- radiates cosiness and warmth

profile:

Bars from oak as standard, but can be made generally from all kind of wood.

Bars are connected by using a stainless steel spring.

Spacers are standard from rigid PVC.

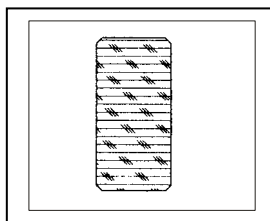

On request anodized aluminium - or stainless steel spacers are available.

dimensions:

- bar height: 22 or 27 mm as standard
other heights on request
- bar width: 9 or 13 mm as standard
other width on request
- distance between wooden bars:
11 or 15 mm
other distances on request

on demand:

- rigid style (threaded stainless bar instead of stainless spring)
- wooden bars parallel to facade
- mitre joints
- curved sections
- surface: untreated, stained, varnished

- suitable frames:

see ADO aluminium and stainless frame profiles – available in many colours (anodized as well as powder coated)

We can also build suitable convector or air duct channels from steel, stainless steel or aluminium to dimension.
