ADO-Metal Drainage UK Tender Specification Details 6.2014

Original ADO[®] Channels made completely of matt finished stainless steel (AISI 304), 1.5 mm thick, entirely welded, continuous grate fitting, surrounding upper drain edge of 25 mm width. Supplied with welded reinforced stainless steel U-sectional bars, welded anchors every 500 mm and welded installation trestles every 1000 mm with adjustable feet for levelling. All channels are supplied with either a surrounding clamping flange for use with vinyl (Altro type) flooring - or without for Tiled or Epoxy floor finishes.

Each **Original ADO[®]** channel shall be fitted with a “Box Drain” made entirely of stainless steel (AISI 304), flanged design with jointing and clamping flanges, removable sludge trap/basket and odour trap with vertical or horizontal drainpipe (depending on depth of slab).

Each channel shall have a special ADO-Metal Roll grid to facilitate easy cleaning made of model **Original ADO[®]** URS-V2A stainless steel, (AISI 304) bar height 25 mm, bar width 40 mm, slotted holes, anti-slip (R13 to BIA test), distance between bars 15 mm.
