ADO-Metal UK began trading in 2008 as a specialist company primarily focussed on the promotion of hygiene and safety products to the Catering Industry. This applies particularly to the ADO® drainage channels and unique roll grids for use in Kitchens and Food Production Units within the foodservice industry.

Specially designed for wet areas, the stainless steel roll grids are non-slip, easy to remove and clean, and very much lighter than the rigid standard grids manufactured and can be lifted easily by any kitchen operative.

They can also be manufactured to fit into most existing drainage channels.

The ADO® product range also includes various types of Swimming Pool Grids, plus Façade and Ventilation grids.
